How to Use the Activity:

****Please make sure students are using the presentation in "edit" mode (NOT in full-screen "presentation" mode) or the interactive slides will not work!****

- This presentation teaches students the 3 types of touch (safe, ouch, private), as well as how to report unsafe touches to a safe person we trust. Approx. 2 weeks before teaching this material, I recommend sending home the parent letter included in the printable resources file.
- After the instructional material in the presentation, there is an interactive activity that lets students practice identifying the difference between safe touch and ouch touch. A total of 28 scenarios are included. To play, students look at the picture shown and decide if it is a safe touch or an ouch touch. If it shows a safe touch, they drag the hand to the "Safe Touch" circle. If it shows an ouch touch, they drag the hand to the "Ouch Touch" circle.
- The presentation closes with 3 questions that students can answer by typing in the text boxes that say "Type here."
- Printable activities are also included in the zip folder that you can use to supplement or close the lesson if you'd like.
