- If you use Google Classroom, please add the resource to your Google Classroom and assign it to students. If not, please follow the directions on the “if you are not using Google Classroom” page.

General Directions:

- To use the drag and drop feature, please click on the check mark circle first to select it. Then, drag it with your finger (if on a touch screen device) or mouse (if on a computer).
- On the pages with text boxes, students can type directly in the box.
- In Google Classroom, or by sharing the link directly with students, any changes that the student makes to the activity will be saved automatically. Each student will have their own copy so other students will not be able to see their responses.
- Please make sure to use the activity in “edit” mode (the way the screen looks when you first open the document, with the little preview of each slide on the left) rather than in full-screen “presentation” mode. If you try to use the interactive features in presentation mode, it will simply click to the next slide.
